

Product name **Maxi II EX Incubator**

Manufacturer BRINSEA PRODUCT LTD

Brand BRINSEA

Origin MADE IN BRITAIN

Maxi II EX Incubator

The Maxi 2 EX makes up for its small size with a huge specification and provides the ideal environmental controls for maximum hatch rates of small numbers of eggs. The high frequency turn facility makes these refined incubators ideal for parrots as well as all other eggs up to duck egg size.

Key Features

- High visibility cabinet
- Automatic egg turning
- External water top-up
- Fan-assisted airflow
- Ventilation control
- Digital temperature display in °C or °F
- Digital humidity display
- Integral automatic humidity control
- Optional periodic egg cooling
- Room temperature alarm
- Incubator temperature alarm
- Power fail indicator
- Programmable turn interval and angle
- High frequency turn option
- Hatching mat & quail, hen, duck and goose egg quadrants supplied as standard
- Protected by Biomaster antimicrobial additive

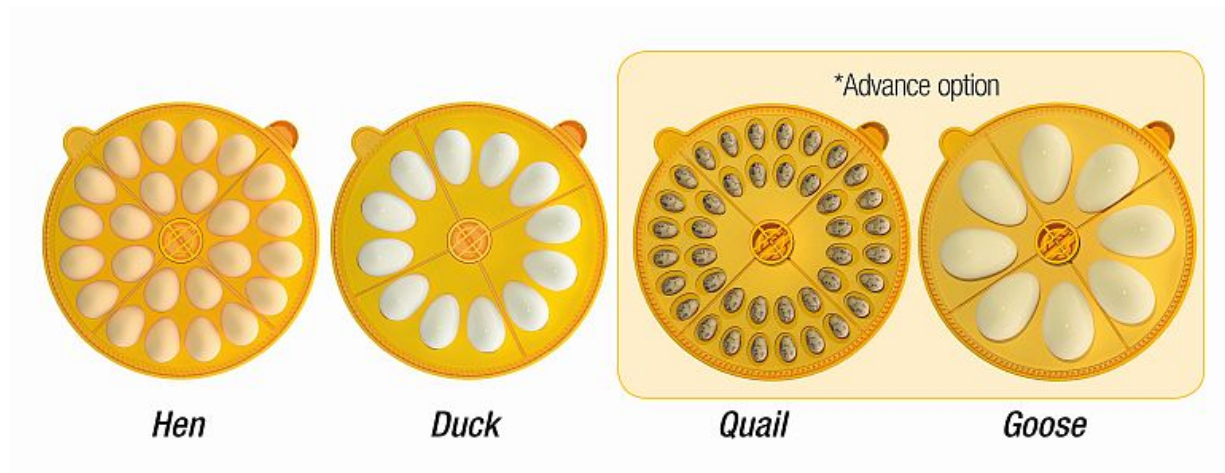

Description

Maxi 2 EX - now available at a lower price!

The Maxi 2 EX combines a useful 24 hen egg capacity with a huge specification yet it's easy to use. It provides the ideal environmental control for maximum hatch rates of small numbers of eggs. The high frequency turn facility makes these refined incubators ideal for parrots as well as all other eggs up to goose egg size. With great visibility of the hatching eggs and the convenience of integral water pump, integral automatic humidity control and the latest technical innovations from Brinsea it takes the guesswork out of incubation.

Maxi 2 EX incubator now holds 24 hens' eggs, thanks to Brinsea's new, innovative system of egg disk quadrants. These quadrants simply clip together to allow eggs of one size to be incubated or eggs of different sizes to be incubated together when using different species specific quadrants. Comes supplied with quail, hen, duck & goose quadrants as standard.

The Maxi 2 EX turns the eggs automatically and provides full digital control of temperature and humidity. Brinsea's patented alarms warn of power failure and incubation temperature fluctuations, this machine also features periodic cooling options. With a high frequency turn option this machine is suitable for incubating a wide range of species.

Maximum Egg Capacities (approximate) using egg disks as supplied:

Quail - 40

Pheasant - 24

Hen - 24

Duck - 12

Goose - 8

Comes supplied with one corrugated hatching mat, additional mats may be purchased for future hatches.

Product code: **AC27B**

Specification

Product weight (g): 1923

Product dimensions inc. PSU/power cable (mm): 354 x 354 x 165

Typical power consumption (Watts): 24

Maximum power consumption (Watts): 40

The Brinsea Maxi II incubators are subject to EU design registration No: 003007103-0002
