Ovation 56 Zoologica Incubator for Exotic Birds Eggs

An extremely high specification egg incubator designed for exotic birds' eggs. The precision control of temperature and humidity with flexible roller turning of eggs and a rigid insulation-filled base. Egg capacity of 40 African Grey-sized eggs.

Key Features

- 40 African Grey egg capacity - higher capacity for smaller eggs
- Display of humidity, integral automatic humidity control
- High quality, high visibility cabinet
- Biomaster antimicrobial plastics
- Insulated base and plinth
- Digital display of temperature °C or °F
- External water top-up
- Incubator temperature alarm
- Automatic egg turning
- Room temperature alarm
- Fan assisted 'Dual-Induced' airflow
- Optional periodic egg cooling
- Programmable turning interval, programmable turning angle (up to 180° for eggs of 45mm diameter)
- FREE hatching mat included
- Customer support online, by email or phone
- Made in Great Britain

Description

The Brinsea Ovation 56 Zoologica is a high-performance incubator specifically designed for exotic birds' eggs, especially parrots, where smaller and delicate eggs are turned on rollers that rotate smoothly. The high-specification, adjustable turning interval and angle makes it ideal for eggs that require frequent, precise turning.

Parrot breeders have known that the main compromise when using an incubator designed for hens' eggs is that the turning isn't sophisticated enough. Some parrots turn their eggs almost continually during incubation and so to replicate this we have developed the Zoologica incubator which turns the eggs on rollers with digital controlled precision. The spacing between these alloy rollers can be adjusted to suit different egg sizes. The Zoologica incubators feature Brinsea's pinpoint control of temperature and humidity along with alarms to warn of power failure or wild room temperature changes to ensure the best possible hatching results for exotic eggs. The temperature control is further improved with the filled, insulated base.

'These new exotic egg incubators represent class-leading technology with the finest incubation management available and are more advanced and refined than some well-regarded incubators costing over twice the price. The inclusion of precision roller turning, as featured in Brinsea's £4,500 Contaq Z7 incubator, completes this impressive design.' **said Frank Pearce, Brinsea's Founder.**

The Ovation 56 Zoologica builds on the highly accurate digital control of temperature and humidity of the EX model with an insulation-filled base and heavy plinth to further improve temperature distribution and overall rigidity. In addition to programmable adjustment of turning interval, the Zoologica models also allow fine adjustment of egg turning angle from 5° to 180° for an egg of 45mm diameter - smaller eggs can be turned at a greater angle if desired.

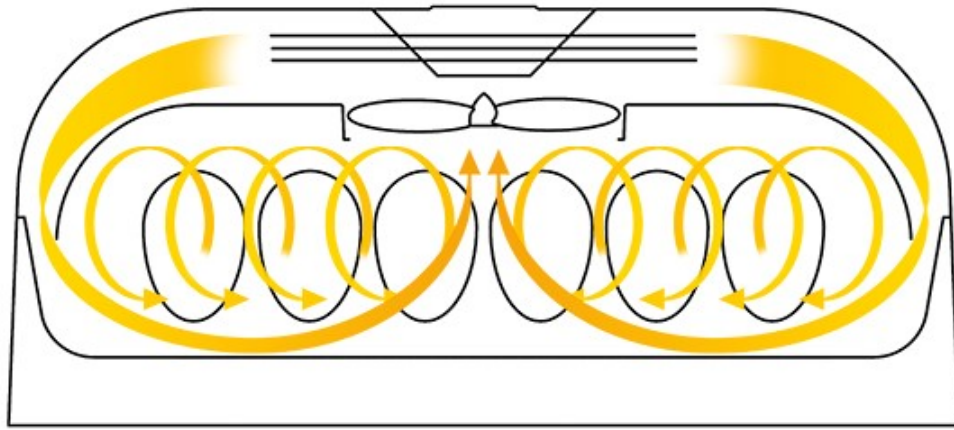

Despite its sophistication the Ovation 56 Zoologica uses factory default settings to ensure it's easy to use straight from the box yet still allows unparalleled flexibility over the control of temperature, humidity and egg turning. An egg capacity of 40 African Grey-sized eggs - and the flexible roller system means that smaller eggs can be accommodated in greater numbers.

Approximate egg capacities:

- Finch - 80
- Cockatiel, Lovebird - 60
- African Grey, Eclectus, Amazon, Cockatoo, small Macaw - 40
- Hen - 40

Protected by Biomaster antimicrobial additive: proven to reduce bacterial growth by up to 99.99% and 100% safe for eggs, chicks and humans. Protects the incubator from microbial growth by reducing the risk of cross contamination and provides a more hygienic environment for your eggs.

The Zoologica features Brinsea's new 'Induced Dual Airflow' system which represents a breakthrough in incubator design and achieves new levels of temperature consistency for optimum incubation conditions.

The Zoologica comes supplied with a FREE hatching mat, replacement packs of [hatching mats](#) are available, product code: AG008

Features of the Zoologica include:

- Zero-impact egg roller turning system for fine control of turning interval and angle
- High quality, high visibility cabinet
- External water top-up
- Digital display of temperature °C or °F
- Automatic egg turning
- Insulated base and plinth to further improve thermal control
- Incubator temperature alarm
- Room temperature alarm
- Display of humidity, integral automatic humidity control

For full product specifications please read the 'Key Features' description.

PLEASE NOTE: when cleaning your incubator you will need to use a cross-head 'Pozidrive' PZ-1 screwdriver. Using the wrong screwdriver may lead to excessive pressure being applied to the screws which may then damage the thread in the lid.

Product code: **AG48B**

Specification

Product weight (g): 6480

Product dimensions inc. PSU/power cable (mm): 583 X 421 x 233

Typical power consumption (Watts): 60

Maximum power consumption (Watts): 115

PLEASE NOTE: when cleaning your incubator you will need to use a cross-head 'Pozidrive' PZ-1 screwdriver. Using the wrong screwdriver may lead to excessive pressure being applied to the screws which may then damage the thread in the lid.

The Brinsea Ovation 28 and 56 incubators are subject to EU design registrations No: 003007103-0003, 003007103-0004, 003007103-0005 and 003007103-0006
